

Episodes: Your Window to the World

Episodes is the official quarterly journal of the International Union of Geological Sciences (IUGS www.iugs.org). It covers developments of regional and global importance in the earth sciences and is distributed worldwide in four issues (March, June, September and December) each about 80 pages long. The journal is likely the most widely distributed earth science journal since copies go to more than 150 countries worldwide. Articles cover a wide range of earth sciences and authors are from all over the world. The content is of interest to a broad audience of professional earth scientists having diverse cultural and linguistic backgrounds. Whether you live in the developing or developed world, you will find lots of content of interest. Published articles include current reviews, new results from research projects of more than local significance, and discussion of the infrastructure of science, including techniques, research programs, organizations, science policy, or technical assistance. The journal offers earth scientists:

authoritative articles that reflect worldwide research advances and evolving trends in geoscience disciplines;
a forum for information exchange within the global earth-science community;

book reviews by experts in your field;

news about activities sponsored by IUGS and its affiliates;

a comprehensive calendar of future international geoscience events and training opportunities; and

concise reports concerning results of international meetings, conferences, and symposia.

Episodes welcomes thoughtful contributions in the topical areas listed above. Please consult the Episodes web site for submission guidelines (<http://www.episodes.org/>). Feel free to direct further inquires concerning preparation and submittal of manuscripts and illustrations, special requirements, and pre-press processing to the Episodes staff whose contacts are listed on the web site.
